CAREER OBJECTIVE

Motivated B.Tech CSE (AIML) student with hands-on experience in full-stack development, data analysis, machine learning, and AI integration. Proficient in Python, Java, SQL, and JavaScript with a track record of shipping AI-powered applications and civic-tech projects. Eager to contribute to dynamic IT and tech teams through strong problem-solving skills and a passion for continuous learning.

WORK EXPERIENCE

AI & Decentralized Tech Intern — Blockseblock (Virtual)	Aug 2025 – Oct 2025
- Built Article Curator tool using Node.js APIs and Python dashboards for real-time data analysis. - Developed and deployed SnapShop AI web app; contributed to IndiaAccelerator-OpenXAI-2025 open-source repo. - Collaborated on AI integration and full-stack architecture under senior mentorship.	
Intern — Civora Nexus (Virtual)	Jun 2025 – Aug 2025
- Performed civic data analysis and anomaly detection for urban infrastructure monitoring. - Enhanced the Civic Anomaly Detector project with improved pothole detection accuracy using ML pipelines.	
Data Science Intern — Prodigy Infotech (Virtual)	Jul 2024 – Aug 2024
Delivered 2 end-to-end ML projects (traffic accident analysis, customer purchase prediction) using Python & scikit-learn.	
Student Intern — YBI Foundation (Virtual)	Jun 2024 – Jul 2024
Completed structured data science training with hands-on Python and ML exercises.	

EDUCATION

B.Tech, CSE – AIML Specialization Sandip University, Nashik	2022 – 2026
XII – Science, GMD College of Arts, Science & Commerce X – Adarsh English Medium School	2022 2020

PROJECTS

SnapShop-AI	Sep – Nov 2025
AI-powered shopping assistant with image recognition; built with React, Python & GenAI APIs. Live on Vercel.	
Civic Anomaly Detector	Aug – Sep 2025
Real-time pothole & urban infrastructure detector using computer vision (OpenCV) and ML classification.	
Customer Purchase Prediction	Aug 2024
Decision Tree classifier predicting customer conversion; ~85% accuracy on bank marketing dataset (Python, scikit-learn).	
Traffic Accident Data Analysis	Jul 2024
EDA on US accident dataset using Pandas & Seaborn; identified key risk factors and geographic hotspot patterns.	

SKILLS

Programming:	Data / ML:
Python, Java, JavaScript, SQL	Data Analysis, Data Structures, Generative AI Tools, MS Excel
Web:	Tools:
HTML, CSS, Web Development	MS Office, Project Management

CERTIFICATIONS

Machine Learning Specialization (Andrew Ng, DeepLearning.AI) · Google Data Analytics Certificate (NSDC/Skill India) · Python for Data Science (IBM, Coursera) · SQL for Data Analysis (DataCamp) · Generative AI Foundations (UpGrad) · Java & DSA (Scaler) · GenAI Exchange Hackathon · Hacknode India Hackathon

ACHIEVEMENTS

- Selected open-source contributor on GitHub for data science repositories.
- Built and deployed personal Avatar Generator Web App showcasing frontend & GitHub project management skills.
- Delivered 2 complete Data Science projects during internship with real-world datasets.
